## Your Views On The Proposal

Q8. Which of the following best expresses your view of the proposed Bill? (please note this is a compulsory question)

Fully supportive

**Please explain the reasons for your response.**

I am sick of hearing about the preventable deaths of junkies. I am sick of seeing living standards and hearing of traumatic life events that push people into self-destruction in this blighted fucking country.

Q9. Do you think legislation is required, or are there are other ways in which the Bill's aims could be achieved more effectively? Please explain the reasons for your response.

Yes legislation is required. Obviously it is. If there is no enforceable law, people won't fucking adhere to it.

Q10. Which of the following best expresses your view of the proposal to establish overdose prevention centres?

Fully supportive

**Please explain the reasons for your response.**

I've already told you.

Q11. Which of the following best expresses your view of the proposal for a licensing regime to enable the establishment of overdose prevention centres?

Fully supportive

**Please provide reasons for your response, including on the proposed conditions for licensing (see pages 12 to 14 of the consultation document) and on the proposal that health and social care**

Q11. Which of the following best expresses your view of the proposal for a licensing regime to enable the establishment of overdose prevention centres?

**partnerships are responsible for licensing and scrutinising OPCs?**

Do I have to say it again?

Q12. Which of the following best expresses your view of the proposal for a new body, the Scottish Drugs Deaths Council?

Fully supportive

**Please provide reasons for your response, including views on the proposed functions of the SDDC (see pages 14 to 16 of the consultation document) and on how it should operate in practice.**

While I have little faith that some committee or council or other will make much difference, it gives some bureaucrats something to do, and it can't do any harm can it? It can't make things any worse than they are.

## Financial Implications

Q13. Any new law can have a financial impact which would affect individuals, businesses, the public sector, or others. What financial impact do you think this proposal could have if it became law?

some increase in costs

**Please explain the reasons for your answer, including who you would expect to feel the financial impact of the proposal, and if there are any ways you think the proposal could be delivered more cost-effectively.**

It'll cost you if you want nurses to work in these places, it'll also cost to run them.

## Equalities

Q14. Any new law can have an impact on different individuals in society, for example as a result of their age, disability, gender re-assignment, marriage and civil partnership status, pregnancy and maternity, race, religion or belief, sex or sexual orientation.

What impact could this proposal have on particular people if it became law? If you do not have a view skip to next question.

Please explain the reasons for your answer and if there are any ways you think the proposal could avoid negative impacts on particular people.

I'd hope that there being less dead junkies scattered around the city who might've recovered with adequate support would have a positive impact on all involved.

## Sustainability

Q15. Any new law can impact on work to protect and enhance the environment, achieve a sustainable economy, and create a strong, healthy, and just society for future generations.

Do you think the proposal could impact in any of these areas? If you do not have a view then skip to next question.

Please explain the reasons for your answer, including what you think the impact of the proposal could be, and if there are any ways you think the proposal could avoid negative impacts?

I have no idea, mate. I'm an idiot, with a fucked up brain, with no expertise in any of these areas.
